ROHIT ANIL ROTE

Frontend Developer

9623891150   rohitrote8806@gmail.com   Pune

SUMMARY

Skilled Frontend Developer with experience in HTML, CSS, JavaScript, and frameworks like Angular, React, React Native. Focused on building responsive, user-friendly interfaces and optimizing performance. Strong collaboration and problem-solving abilities.

EXPERIENCE

Frontend Developer, Rabbit And Tortoise Technology Solutions.
08/2022 - Present

Project: UJD to Tags(Amdocs)

A web application built using **Angular** technology, aimed at generating test artifacts through a **GenAI model** using uploaded documents. The application enhances data transformation and visualization, making test artifact generation more efficient.

Responsibilities:

- Developed a **web application for automating test case generation** from user journey documents (UJD), reducing manual effort and improving efficiency.
- Implemented OAuth for secure third-party authentication in the project
- Designed and implemented a **component-based architecture** in Angular to ensure scalability, reusability, and modularity of the application
- Enabled users to:
- **Upload documents** and generate test cases dynamically.
- Visualize test cases in a **tabular format** with options for manual editing.
- **Export test cases as Excel files**, streamlining test management processes.
- Collaborated with backend developers to integrate APIs for seamless document processing and data retrieval.
- Deployed the application on an **IIS server**, ensuring a stable and accessible hosting environment.
- Focused on creating a user-friendly interface to simplify workflows and enhance usability.

Project: Ask Lisa Use Case(Amdocs)

A web application built using Angular technology, focused on providing graphical representation of employee data for analytical purposes.
The application leverages the NG2 Charts library to create interactive and visually appealing charts, simplifying data interpretation and enabling better decision-making.

Responsibilities:

- Designed and developed a **web application for graphical representation of data** using Angular, enabling users to analyze data through interactive visualizations.
- Built **component-based architecture** to ensure reusability, scalability, and maintainability of code.
- Implemented various charts including **line, bar, pie, multiline, doughnut, histogram, and scattered charts** to cater to diverse data analysis requirements
- Utilized **NG2 Charts and Chart.js libraries** to create dynamic and customizable chart components.
- Managed application state efficiently using **NGXS Store**, improving data flow and reducing complexity in the application.
- Worked closely with stakeholders to gather requirements, incorporate feedback, and deliver user-focused solutions.

Project: Quality Management System (Internal)

A web application built in **React.js** designed to streamline quality processes and ensure compliance with industry standards. The system facilitates efficient tracking, documentation, and reporting of quality issues, audits, and corrective actions.

Responsibilities:

- Designed intuitive **UI** to enhance user experience and facilitate seamless navigation.
- Integrated **APIs** to implement essential functionalities for effective data management.
- Developed multiple features, including:
  - Organizing meetings for different users.
  - Calendar view for scheduled meetings.
  - Audit calendar for tracking quality compliance.
- Collaborated with cross-functional teams to ensure alignment with project goals and user needs.
- **Deployed the application on an AWS EC2 instance**, ensuring high availability, scalability, and secure access.

EXPERIENCE

Project: Pheal Care Mobile Application (Pheal Care India)

Comprehensive cross-platform mobile application (Android and iOS) that connects patients with qualified physiotherapists. The app provides users with personalized physiotherapy care, improving health outcomes through seamless patient-therapist interactions. Equipped with innovative features to enhance engagement and streamline healthcare processes.

Responsibilities:

- Developed a **cross-platform mobile application** for **physiotherapists** using **React Native** to support both Android and iOS platforms, improving accessibility for users.
- Built the **admin portal** for managing the application's data and operations using **React.js**, ensuring ease of use and efficient management of patient and hospital details.
- Implemented key features including:
- **Doctors registration** and profile management for seamless onboarding.
- **Digitalized prescriptions** for physiotherapy treatments, improving patient care accuracy and ease of access.
- **Hospital management system** with **QR code attendance**, streamlining patient tracking and attendance records.
- Integrated **Razorpay payment gateway** for secure, efficient, and smooth payment transactions.
- Configured **push notifications** to keep patients and physiotherapists updated on appointments and activities.
- Deployed the mobile app on **Google Play Store** and **Apple App Store**, ensuring a smooth release process and handling the necessary configurations for successful deployment.
- Collaborated with backend developers to integrate APIs, enabling efficient data flow between the app and the server.
- Focused on enhancing the user experience by implementing responsive layouts, intuitive navigation, and interactive features.

EDUCATION

BSc Computer Science
Marathwada Mitra Mandal's College (Pune University)

2017 - 2020

MSc Computer Application
Modern Collage,Ganeshkhind (Pune University)

2020 - 2022

SKILLS

Frontend: Html, css, JavaScript, TypeScript, React JS, React Native, Angular, Next JS

Backend: Node JS, Express JS

Database: MySQL , MongoDB

COURSES

MERN Stack Certification (8 Months)Institute: Seven Mentors Pvt Ltd, Pune 411005

LANGUAGES

English   Hindi   Marathi
